**Subject:** PLP Information request

Hi Cara,

As a follow up to my question on the phone. Is the the request to PLP for a list of the information that they have on your plate? We would like to get that going, so if you are doing it - great. If not we need to do it.

Some great developments today. In particular I got a call from a friend at USGS. It turns out they wanted to do something like what we are proposing. In their terms they are interested in looking at the compatibility of mineral development with other resources, salmon in particular. So there may be an opportunity to partner on this effort. That would be great.

Have a good weekend.

Thanks  
Phil
